DESIGN

NOTE: The EK01™ fits standard (SAPI) cut plates.

AirLite™ plate carriers are the lightest MOLLE-compatible plate carriers in the world. Although they're ridiculously light, they're also extremely durable and strong carriers. The EK01™ was created to find out exactly how light and minimal one could go while still offering a plate carrier that was comfortable and durable enough for extended wear, mission after mission. We are proud to offer the EK01™ as the definition of the extreme end of the lightweight spectrum. Minimal weight, minimal bulk, minimal complexity. AirLite™ is the original and best ultra-light carrier system. Beware of copycats. Patents pending.

CARE INSTRUCTIONS

Do not machine wash or dry. Remove dirt by using a cloth or soft brush. Hand wash with warm water and cloth or soft brush and air dry indoors or in shade.
