DESIGN

Our G4 Female Fit Combat Shirt features the same innovative, custom stretch **VTX RIPSTOP™** fabric as the standard G4 Combat Shirt, with a design that is custom patterned to fit our female customers. The G4 Female Fit Combat Shirt torso is constructed with lightweight, high performance, flame-resistant jersey fabric. Invista's T420 high tenacity nylon fiber cuts weight and increases durability in the sleeves; which feature a reduced circumference and raised armholes for enhanced mobility and a more ergonomic female fit. Designed to be worn under body armor, the integrated stretch allows for a slimmer cut with maximum mobility. The front seam bust shaping and minimized shoulder width provide for a slimmer profile and reduced bulk with the low-profile zippered shoulder pockets still allowing room for all essential gear. Reduced zip collar length for easy donning/doffing. Designed for use with all removable **AIRFLEX™ ELBOW PADS** (sold separately). All of this combined provides uncompromised performance built specifically for women. Made in US from US materials. WWW.LWPATENTS.COM
